In the paper “Improvement of OMI ozone profile retrievals by simultaneously fitting polar mesospheric clouds”, the acknowledgements section was incomplete. The correct acknowledgements should appear as below.

*Acknowledgements.* The authors thank the OMI and MLS science teams for providing the satellite data. Research at Pusan National University by J. Bak and J. H. Kim was financially supported by the “Development of Atmosphere/aviation Algorithms” project, funded by ETRI, which is a subproject of the “Development of Geostationary Meteorological Satellite Ground Segment (NMSC-2016-01)” program funded by the NMSC (National Meteorological Satellite Center) of the KMA (Korea Meteorological Administration). Research at the Smithsonian Astrophysical Observatory by X. Liu and K. Chance, as well as J. Bak during her 3-month visit to the Harvard-Smithsonian Center for Astrophysics, was funded by the NASA Aura science team program (NNX11AE95G and NNX14AF16G) and the Smithsonian Institution.
