Due to an oversight, the authors D. C. Fritts and D. Janches were missing from the original version of this article. This corrigendum corrects the author list and the acknowledgements of the original article.

Acknowledgements. C. J. Wright and N. J. Mitchell are supported by NERC grant NE/K015117/1. N. P. Hindley and A. C. Moss are supported by NERC PhD studentships awarded to the University of Bath. D. C. Fritts and D. Janches are funded by NSF Grants AGS-1112830 and AGS-0944104. C. J. Wright would further like to acknowledge Tracy Moffat-Griffin (BAS) for useful discussions related to the radiosonde analysis, Scott Osprey (Oxford) for useful discussions relating to wave physics, and the NERC SG-WEX project group for useful discussions related to a very preliminary version of these results.

The authors would particularly like to acknowledge the many years of work carried out by all the instrument teams referenced and studied in this article. ECMWF analyses and radiosonde data were obtained from the BADC, COSMIC from the CDAAC, SABER from the GATS, Inc. website, AIRS and MLS-Aura from NASA-Mirador, and HIRDLS by direct correspondence with John Gille (NCAR/CU Boulder). SAAMER is maintained by the Estacion Astronomica Rio Grande.
