

Interactive comment on “Continuous low-maintenance CO₂/CH₄/H₂O measurements at the Zotino Tall Tower Observatory (ZOTTO) in Central Siberia” by J. Winderlich et al.

J. Winderlich

jan.winderlich@bgc-jena.mpg.de

Received and published: 14 April 2010

An error was found in Fig. 6 in Winderlich *et al.* By mistake the CH₄ and H₂O time series does not only include the 301 m level, but it contains data from all measurement heights. The error has been fixed in the updated Figure (see Fig. 1 in this document).

Text and formulas are not affected.
