Dear Editor and Reviewers,

Thank you for considering our manuscript entitled “Analysis of co-located MODIS and CALIPSO observations near clouds”, and for preparing such thoughtful reviews. We appreciate the general comments, which capture the essence of our manuscript very well, and we are grateful for the specific comments, which greatly helped improving the manuscript. While, for brevity, our detailed response describes only the action we took in response to each specific comment, let us mention here that we heartily agreed with the suggestions and thought that the points raised in the reviews were very good indeed.
