Interactive comment on "Remote sensing of aerosols by using polarized, directional and spectral measurements within the A-Train: the PARASOL mission" by D. Tanré et al.

D. Tanré et al.

didier.tanre@univ-lille1.fr

Received and published: 21 June 2011

We are grateful to the reviewer for useful comments. Our answers are given below.

General comments: (1) section 2 has been shortened and subsections removed to avoid duplication as suggested. (2) We tried to improve the language by considering the comments of the reviewer.

Answers to main specific comments: (1) Abstract has been rewritten (2) Figure 4 has been changed. It is now a scatter plot that allows to estimate the accuracy.

We have accepted all specific comments in the revised paper.
