

Interactive comment on “Refractivity and temperature climate records from multiple radio occultation satellites consistent within 0.05%” by U. Foelsche et al.

U. Foelsche et al.

ulrich.foelsche@uni-graz.at

Received and published: 22 June 2011

We would like to thank referee #1 for the review of our paper and his/her appreciation of our work.

Thank you also for the comment regarding the small font size in the figure labels. The format of the discussion paper (with its landscape orientation) differs considerably from the format of the final AMT paper. This is particularly unfavorable in the case of full-page figures in portrait orientation (Fig. 2, Fig 3., Fig. 5 and Fig. 6). When preparing the manuscript we had the final layout in mind. We will make sure that the font size in the final version is sufficiently large.
