Received and published: 9 July 2012

Dear Y.S. Chiang and Co-authors,

The anonymous reviewers unanimously agree that the manuscript 'Evaluation of Surface Model for Aerosol Optical Thickness over Land Surface' is not publishable in its current form. Based on the outcome of the anonymous review process and on my own reading of the paper, I think it will take a long time and require a big effort to work on the reviewers comments to produce a revised version of the manuscript. Based on the foregoing I do not encourage the submission of a revised draft. I therefore suggest that the current version be withdrawn and, when ready, resubmit it to AMT or other journal of your choice. If resubmitted to AMT it will be treated as a new submission.
