Received and published: 25 February 2013

We would like to expand the acknowledgements section of our paper as follows.

All the PIs of the ozonesonde stations whose data were used in this work are gratefully acknowledged. WUDC, NDACC and SHADOZ data have been downloaded by the respective websites, and are publicly available. ISAC-CNR, ReSMA-Italian Air Force and CETEMPS are acknowledged for the provision of Italian ozonesonde data. The ozone monitoring activities of CETEMPS are partly funded by the Italian Ministero dell'Ambiente e della Tutela del Territorio e del Mare. Marco Iarlori (CETEMPS) is gratefully acknowledged for his help with L'Aquila ozonesonde station data, Marco Cervino (ISAC-CNR) is gratefully acknowledged for his help with San C4004

Pietro Capofiume ozonesonde station data. Stefania Vergari and Emanuele Vuerich (ReSMA, Italian Air Force) are gratefully acknowledged for their help with Vigna di Valle ozonesonde data. Michael Yan (NASA Aura Validation Data Center) is gratefully acknowledged for providing the OMT03 overpass files for the stations Barbados, Maxaranguape, Whitehorse and Yellowknife upon request. The NCEP Reanalysis data are provided by the NOAA/OAR/ESRL PSD, Boulder, Colorado, USA, from their website at <http://www.esrl.noaa.gov/psd/>. ADN would like to thank several people from the Royal Netherlands Meteorological Institute, for valuable discussions that improved the paper significantly.
