

# ***Interactive comment on “HOLIMO II: a digital holographic instrument for ground-based in-situ observations of microphysical properties of mixed-phase clouds” by J. Henneberger et al.***

**J. Henneberger et al.**

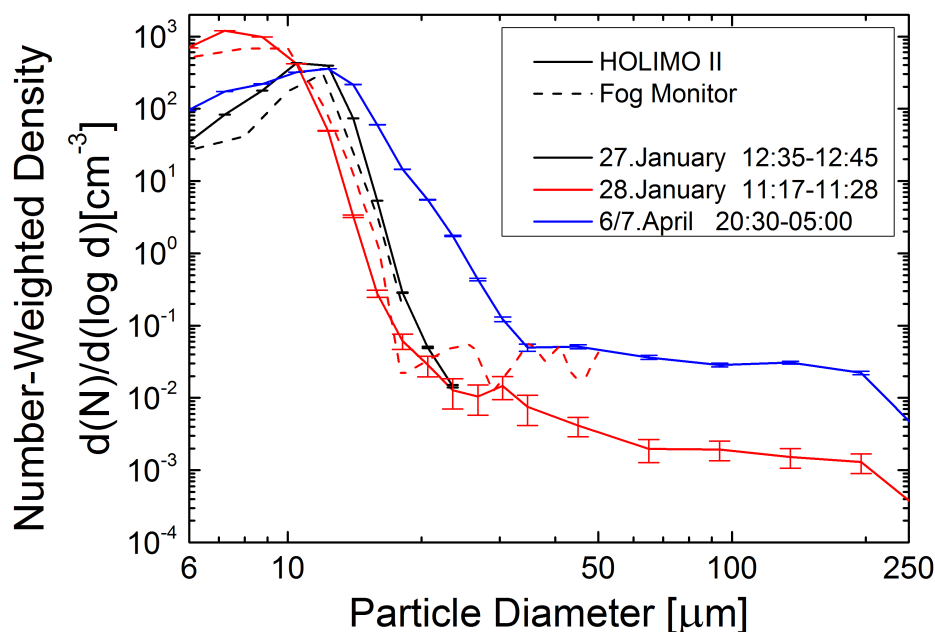

jan.henneberger@env.ethz.ch

Received and published: 10 September 2013

The Figures 7, 8 and 9 were replaced by updated versions. The normalization of the size spectra is now done by the commonly used division of the concentrations by  $[\log(\text{upperBinSize}) - \log(\text{lowerBinSize})]$ . These changes do not change the interpretations of the graphs.

Interactive comment on Atmos. Meas. Tech. Discuss., 6, 4183, 2013.
