“Quality aspects of the measurements of a wind profiler in a complex topography” by
M. Maruri et al.

Dear Referee

We've tried to answer to all the suggestions and respond to the improvements aspects pointed out. We've highlighted comments from the referees in bold font while our responses to reviewers are in regular font.

We would like to thank the referee for the suggestions. We really appreciate the effort to

help the authors clarify the text. The work has involved a revision of a large database. Many details and secondary results were omitted by the authors to try to emphasize the main result and to simplify the complex methodology.

The answers are upload in a pdf file attached in the Supplement.

Best regards

The authors,
