Comparison of profile total ozone from SBUV(v8.6) with GOME-type and ground-based total ozone for 16-year period (1996 to 2011)

Response to Comments from Referee #2

(1) During reviewing procedure no principal opinions against this paper occurred. The minor reviewer's suggestion deals with figures caption and they were not important. I think the paper has usual scientific standard and is suitable for publication.

\* The authors would like to thank the reviewer for recommending the paper to be published.  
C4573

lished. Concerning the figures caption, if specific changes could be suggested, we will make our efforts to change accordingly.
