Interactive comment on "Benefit of depolarization ratio at $\lambda = 1064$ nm for the retrieval of the aerosol microphysics from lidar measurements" by J. Gasteiger and V. Freudenthaler

Anonymous Referee #1

Received and published: 19 June 2014

Please revise the presentation and language of your work, including more information about inversion theory and lidar technique, in order to put your work in a better context for the reader that is not familiar with these methods.
