

Interactive comment on “On the microwave optical properties of randomly oriented ice hydrometeors” by P. Eriksson et al.

P. Eriksson et al.

patrick.eriksson@chalmers.se

Received and published: 31 March 2015

Our response is found in a separate pdf document (denoted as supplement). This response was written assuming that it would be possible to also upload the revised manuscript and the article supplement we now have created. However, the only way to upload more than one attachment is by creating a zip file, which is not very "user friendly". For this reason, revised manuscript and article supplement will be submitted first when we respond to the associated editor.

Please also note the supplement to this comment:
