## ***Interactive comment on “EARLINET instrument intercomparison campaigns: overview on strategy and results” by U. Wandinger et al.***

**Anonymous Referee #1**

Received and published: 9 November 2015

This paper describes instrument intercomparison in EARLINET in details, which is essential to high quality networking. The paper also provides a good introduction to the technical issues described in other papers in the EARLINET special issue. The manuscript is very well written.
