

## ***Interactive comment on “Systematic evaluation of the impacts of GPSRO data on the prediction of typhoons over the Northwestern Pacific in 2008–2010” by Y.-C. Chen et al.***

**Anonymous Referee #2**

Received and published: 13 April 2015

I have gone through the revised manuscript and responses provided by the authors for comments from the previous round of discussions.

The quality of this manuscript is much improved, and I commend the authors for a nice article on impacts of GPSRO data on TC forecast improvements.

I also encourage the authors to extend the GPSRO impact study using more recent super typhoons, especially on intensity forecasts.
