

Interactive comment on “Bulk density and its connection to other microphysical properties of snow as observed in Southern Finland” by Jussi Tiira et al.

J. Tiira

jussi.tiira@helsinki.fi

Received and published: 26 July 2016

Dear reviewer,

Thank You for Your helpful comments. After a short summer break we are currently working on giving our answers and making the necessary modifications to the manuscript. I would request clarification for Your specific comment 11. It seems like a part of the sentence is missing: "Although you show the temperatures of the observations in Table 1, it would be good to me".

Could You please rephrase this comment?
