Received and published: 23 January 2017

Dear authors,

We significant delay in part due to the difficulty to gather reviews on this topic outside the community involved in WMO-SPICE, which covers a significant fraction of the international scientific community involved in solid precipitation science, two independent reviews have now been provided. Authors are now asked to post on the AMT discussion forum a point-by-point reply addressing reviewers comments and suggestion, and prepare an upload a revised manuscript accordingly. Apologies for the time taken by
