

***Interactive comment on “Comparison of the Arctic upper-air temperatures from radiosonde and radio occultation observations” by Liang Chang et al.***

**Anonymous Referee #2**

Received and published: 29 August 2016

The authors make great efforts to compare the arctic upper-air temperature from the radiosonde and cosmic RO wetPrf data. Some results have been shown. But many similar works have been published. So I think the authors should add some novel study in this Paper.
