In reading more about the use of AOTF in atmospheric research, I came across the following paper which I think includes a lot of useful information and could be referenced in the final version of your manuscript (perhaps in the introduction?)

Cheng, A., Chan, M.H., 2004. Acousto-Optic Differential Optical Absorption Spectroscopy for Atmospheric Measurement of Nitrogen Dioxide in Hong Kong. Appl. Spectrosc. 58, 1462–1468.

Thank you for your consideration.
