Dear Dr. P. Sellitto,

Thanks a lot for your short comment.

Yes, it seems evident that, as clearly stated by one of the referees, 3 points need definitively be addressed in the revision:

1. The English usage could be improved. 2. Relevant references are missing (including the one you are pointing out). 3. Quantifying the errors and uncertainties, and evaluating the impact of these errors and uncertainties on the aerosols microphysical properties.

C1

Yours sincerely

Xavier Querol
