

# ***Interactive comment on “Mean wind vector estimation using the Velocity-Azimuth-Display (VAD) method: An explicit algebraic solution” by Gerd Teschke and Volker Lehmann***

## **Anonymous Referee #2**

Received and published: 15 February 2017

The authors have addressed my original criticisms, comments and questions. Just a couple of minor suggestions:

Conclusions section, lines 9-10: Change "The total retrieval error is depending on ..." to the "The total retrieval error is dependent upon..."

Also in several places the author makes reference to the "zenith distance" or the "zenith distance angle." I would suggest changing this to simply "zenith angle".
