

Interactive comment on “In-flight performance of the Ozone Monitoring Instrument” by V M. Erik Schenkeveld et al.

M. Dobber (Referee)

Marcel.Dobber@eumetsat.int

Received and published: 17 January 2017

This paper had previously been submitted for Atmospheric Chemistry and Physics (ACP), now for Atmospheric Measurement Techniques (AMT). My review comments were already provided for the previous ACP submission, and accounted for by the authors in this updated manuscript, hence I have no further comments, hence I propose to publish as is.

Interactive comment on Atmos. Meas. Tech. Discuss., doi:10.5194/amt-2016-420, 2017.
