

Interactive comment on “High spatial resolution imaging of methane and other trace gases with the airborne Hyperspectral Thermal Emission Spectrometer (HyTES)” by G. C. Hulley et al.

Anonymous Referee #2

Received and published: 9 May 2016

The reviewers did an excellent and detailed set of recommendations. The JPL team did respond to the reviewer recommendations.

I was surprised that it appears JPL did not do an in-house review prior to submission for publication. Thanks to the review comments the article will be an important contribution.
