

# ***Interactive comment on* “Reflected ray retrieval from radio occultation data using radio holographic filtering of wave fields in ray space” by Michael E. Gorbunov et al.**

## **Anonymous Referee #1**

Received and published: 6 September 2017

The authors present an advanced method to detect reflection signals in GPS occultation data. The method is clearly described with nice viewgraphs, detailed formulas and examples. I do not notice any error. Generally, the article is well suited for a publication in the AMT journal.
