

Interactive comment on “GARRLiC and LIRIC: strengths and limitations for the characterization of dust and marine particles along with their mixtures” by Alexandra Tsekeri et al.

Anonymous Referee #3

Received and published: 30 August 2017

Authors addressed all the concerns that I raised in my review for their paper. I recommend publishing the paper of Tsekeri et al in its revised version. Good luck with your future studies of the mineral dust related particles at the dust hot spot of Europe!
