

Interactive comment on “Retrieval of tropospheric NO₂ columns over Berlin from high-resolution airborne observations with the spectrolite breadboard instrument” by Tim Vlemmix et al.

Tim Vlemmix et al.

t.vlemmix@tudelft.nl

Received and published: 25 September 2017

The co-author list of the discussion paper (amt-2017-257) is accidentally incomplete; dr. Thomas Ruhtz from the Free University of Berlin should have been included as co-author for his important contributions to the AROMAPEX campaign and for providing AERONET data as well. This will be corrected in the final version of the manuscript. Please find attached the discussion paper with the correct co-author list. Changes with respect to manuscript version that is currently under review: (1) one co-author added; (2) acknowledgements section modified accordingly.
