Dr. Marloes Gutenstein-Penning de Vries

AMT Associate Editor

Dear Dr. Gutenstein-Penning de Vries

Thank you for your suggestions to improve the paper, we appreciate very much. According to your suggestions, we grouped the results into bullet points/short statements in the conclusions, retaining only the most important information. We also re-structured the abstract to include the most important information.

In our former submission the amount of changes in the text exceeded, largely, the 50 % of it. That was the reason we did not included the marked revisions. In this case we do.

Best regards

Dr. Juan Carlos Antuña Marrero
