Received and published: 6 July 2018

I would like to thank Rick Wehr for this short comment and for bringing this paper to my attention – it did not come up in any of my searches, nor did I find it referenced by other papers in the area. I agree that Appendix A is indeed fully consistent in its treatment of the isotopologue calculations and should be duly acknowledged. I will cite the paper in the revised manuscript and include it in the description of prior work.
