Received and published: 8 February 2019

We strongly thank the referee for his/her review and for the very useful comments provided. Concerning the routines availability, we are very happy to inform that they are now available at the Nextdata geonetwork website (<http://geonetwork.igg.cnr.it>). This information (with the link for downloading the routines) is reported in the revised manuscript. Concerning the topic of the real-time data deliver, we agree with the referee which this a relevant topic in the context of scientific services. Actually, a set of real-time (or near-real time) data delivery service are active and they are fully integrated with the system as described in the revised manuscript. A specific section
