Dear Reviewers and Editor,

We would like to thank all the reviewers again for the time spent to evaluate our work and for the useful and constructive comments they gave which help to improve our work. We also acknowledge the editor. Here we submit a final version of manuscript which includes all proposed changes during the discussion that we think are necessary to be made in the revised manuscript. Some final changes are made in related abstract/conclusions, regarding the additional comparison with ground-based lidar measurements. Thanks again for your contribution.
