# Update of IASI channel selection with correlated observation-errors for NWP

By Coopmann et al.

Dear Thomas von Clarmann,

I would like to thank you for your prompt return and evaluation of the article.

I have taken your last remarks into account, however, I did not understand what you meant by that:

"P8 L32: began to be used."

So I didn't change the text, which can be done in latex. Finally, I remind you that the title of the article has changed.

Thank you again for the follow-up you got for this paper.

Yours sincerely,

Olivier Coopmann
