

Manuscript Edits – Woo et al., “Concept for an electrostatic focusing device for continuous ambient pressure aerosol concentration.”

5 June 2019.

We thank the editor for his feedback and input. The following changes have been made to the manuscript, as per his suggestions. All edits have been highlighted in the included annotated, updated manuscript.

- Text in the Introduction and Prototype Design sections have been adjusted and reworded for improved clarity.
- Figure 6 has been altered such that each applied voltage dataset for enrichment vs. particle diameter is a different color, for improved readability.
- Minor typographical corrections have been made.
