

***Interactive comment on “Use of automatic
radiosonde launchers to measure temperature and
humidity profiles from the GRUAN perspective” by
Fabio Madonna et al.***

Received and published: 16 March 2020

This is a good and relevant paper to publish for Atmospheric Measurement Techniques because the paper's first steps towards demonstrating reliability of Automatic Radiosonde Launchers (ARLs) hold important news for the worldwide radiosonde community. Some revision of typos and unclear language is advisable; I'll provide my list of 'technical corrections' in support of this.
