

Interactive comment on “Probabilistic analysis of ambiguities in radar echo direction of arrival from meteors” by Daniel Kastinen and Johan Kero

Anonymous Referee #1

Received and published: 2 June 2020

The reviewer agrees with the outline of the plan for revising the manuscript proposed by the authors. It will sharpen the focus of the paper, and will make its scientific contribution clearer. While the reviewer does not yet fully understand the idea of the proposed 'maps equivalent to Fig.13', it can be examined after the revised manuscript is completed.
