Table S1. Comparisons of the concentrations of OC and EC between different cities in China andaround the world.

	Atmospheric Pressure (hPa)	Relative Humidity (%)	Temperature (°C)	Wind Speed (m s <sup>-1</sup> )	Total Precipitation (mm)
Spring	1009.9	66.0	16.8	1.9	256.3
Summer	1000.7	72.6	26.7	1.4	586.0
Autumn	1014.6	71.0	19.5	1.7	218.5
Winter	1027.0	63.9	5.7	1.7	82.1

Table S2. Statistics on the meteorological factors in four seasons at NUIST site during the study
 period.

**Figure S1.** Correlations between the real-time OC, EC and TC concentrations and sampling OC,

30 EC and TC concentrations during the corresponding periods.

31

Figure S2. dEC/OC variation at different intervals of OC/EC ratios in spring (a), summer (b),
autumn (c) and winter (d).

Figure S3. Time variations of OC, EC, dEC, dEC/OC, OC/EC and fire points obtained from the
Fire Information for Resource Management System (FIRMS) derived from the Moderate
Resolution Imaging Spectroradiometer (MODIS).

39

Figure S4. 48-h back trajectories at 500 m from the study site from 8 June 2015 to 9 June 2015(a),
11 June 2015 to 12 June 2015 (b), respectively and from 7 February 2016 to 10 February 2016 (c)

11 June 2015 to 12 June 2015 (b), respectively and from 7 February 2016 to 10 February 2
and 26 February 2016 to 27 February 2016 (d), respectively.
