

Answer to Associate Editor's Comments to the author:

The reviewers' comments seem to have been addressed satisfactorily in the responses. However, the changes in the revised manuscript (version 4) cannot be checked because the track-changes version is not provided. Please provide this.

We thank the associate editor for his comment, and provide here the track-changes version. (the AMT online system asks to provide a new version of the manuscript with the answer. Please note we provide the same document as in the previous submission of revised manuscript (version 4)).
