

Dear editor,

We have submitted the revised version of our manuscript.

We are happy to receive your positive assessment of our manuscript. In your previous comments, you have given us very clear and concrete instructions on how we should further shorten the Discussion text. We'd like to thank you for that.

We have added the table to the Discussion you requested (Table 1), and shortened the Discussion text to 50 lines. Any text about instrument performance that we felt could be valuable for a portion of the readers we moved to the Supplementary Materials.

Furthermore, we have addressed the smaller comments about units and the inclusion of copyright information.

We look forward to hearing from you,

Kind regards,

On behalf of all authors,

Susanna and Shelley
