

## Reviewer 1

### General Comments:

Very nice job revising the paper to respond to the comments of both reviewers. I had a few specific editorial comments (below)

[Thank you for helping us make the manuscript better.](#)

### Specific Comments:

Line 102: Suggest adding a period after "ratios" and starting a new sentence.

[Done!](#)

Line 136: Suggest removing the contraction and changing to "It is"

[Done!](#)

Line 145: Suggest capitalizing the new words in the heading to match with major section 2, 4 heading format.

[Done!](#)

Line 171-172: The language could be improved ("and therefore be in the next day" is confusing), and you have "and therefore" twice in one sentence

[Done!](#)

Line 204: I think "Algorithm" doesn't need to be capitalized?

[Done!](#)

Line 285 and 291: spell out "six"

[Done!](#)
