Figure S1. Summary of temporal deployment of Modena SUs at both sites.

Figure S2. Box plots showing pollutant concentrations at UB and UT deployment sites of Modena dataset using 1 h averaged data. The central line indicates the median, and the bottom and top edges of the box indicate the 25th and 75th percentiles of the data, respectively. The whiskers extend to the minimum and maximum values.

Table S7. Sensor to reference correlation in urban background (UB) site, and in urban traffic (UT) site of Modena dataset.

SU	UB			UT	
	NO	NO ₂	O ₃	NO	NO ₂
