

Manuscript number: AMT-2023-61

OH airglow observations with two identical spectrometers: benefits of increased data homogeneity in the identification of the 11-year solar cycle-, QBO-induced and other variations by Carsten Schmidt, Lisa Küchelbacher, Sabine Wüst, and Michael Bittner

I am satisfied with the authors detailed response to my questions and subsequent modifications made in the current form of the manuscript. I therefore find the manuscript suitable for publication in Atmospheric Measurement Techniques in its present form.
