

Supplementary material

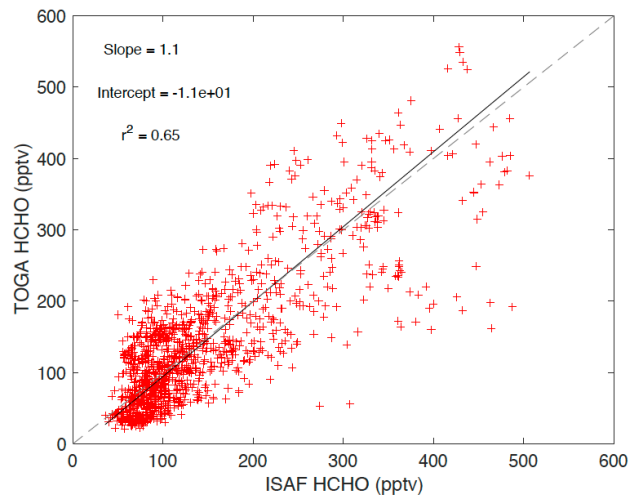

Figure S1. TOGA HCHO measurements vs. ISAF HCHO measurements during ATom-4 over oceans. Equally weighted linear regression yields a slope of 1.1 and an intercept of -11. The correlation coefficient $r^2 = 0.65$.

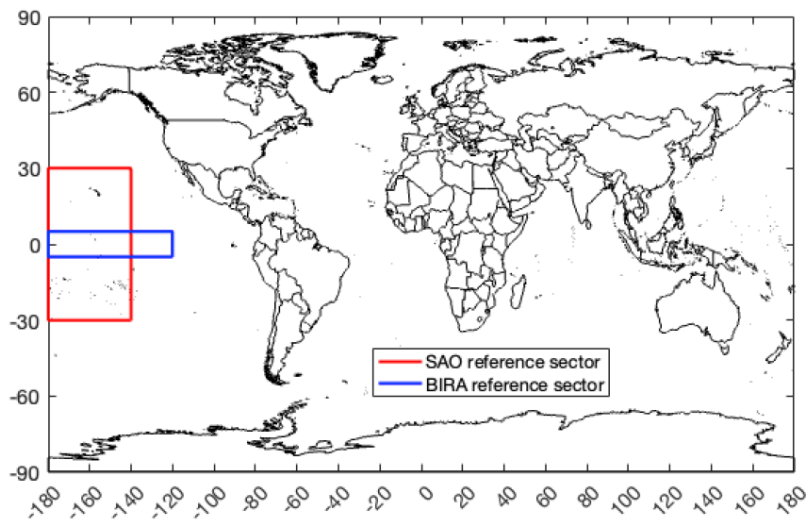

Figure S2. Global map of average HCHO vertical column over ATom-1 sampling period for (a) OMI SAO (v004), (b) OMI SAO (v003), and (c) their differences.
